Preface

ZERO TO ONE

EVERY MOMENT IN BUSINESS happens only once. The next Bill Gates will not build an operating system. The next Larry Page or Sergey Brin won't make a search engine. And the next Mark Zuckerberg won't create a social network. If you are copying these guys, you aren't learning from them.

Of course, it's easier to copy a model than to make something new. Doing what we already know how to do takes the world from 1 to *n*, adding more of something familiar. But every time we create something new, we go from 0 to 1. The act of creation is singular, as is the moment of creation, and the result is something fresh and strange.

LES MÉTIERS DU FUTUR

Avocat augmenté, éducateur de robot, éthicien de l'IA,
médecin numérique, neuro-manager...

Prospectives et paroles d'experts

FIRST
Editions

QUE FERONT NOS ENFANTS DEMAIN ?

Le futur, c'est demain. Avec les récents développements de l'intelligence artificielle, l'automatisation des tâches, l'internationalisation constante des marchés, la dématérialisation croissante des échanges, l'essor des services à la personne et l'accélération du freelancing, le marché du travail va connaître de profondes mutations dans les années à venir.

À quoi ressemblera le marché du travail dans 10, 20 ans ? Quels métiers exerceront nos enfants ? Dans quel environnement et pour combien de temps ?

Grâce à un fin travail d'analyse, les auteurs tentent l'exercice de la prospective et proposent, en donnant la parole à de nombreux experts, des fiches métiers pour le futur : avocat augmenté, éthicien de l'intelligence artificielle, éducateur de robot...

Un inventaire très stimulant, loin des idées reçues que l'on peut avoir sur le monde de demain, dont la lecture vous permettra d'y voir plus clair sur ces métiers qui n'existent pas encore ou pas dans cette forme.

Après 20 ans de carrière dans le monde des médias et de la communication (notamment chez Facebook), Isabelle Rouhan fonde en 2017 son cabinet de recrutement, Collini Talent, spécialisé dans la transformation digitale. Elle a donc un poste d'observation avancé sur la transformation des entreprises et du marché du travail.

Clara-Diane Schmelck est journaliste et philosophe, spécialiste des nouveaux médias.
